ANNOTATSIYA

Maqolada o'quvchilarga matematika fanini qiziqarli va tushunarli qilib o'qitish uchun o'quvchilar tomonidan yo'l qo'yiladigan xatoliklarga nisbatan matematik yumorlardan kasrlarni qisqartirish, kasrlarni qo'shish, logarifmlar, burchaklar yig'indisi sinusi tushunchalari misolida qanday qilib foydalanish haqida ma'lumotlar keltirilgan.

Kalit so'zlar: Matematik yumor, tub sonlar, proporsiya, kasrning maxraji va surati, kasrni qisqartirish, kasrlarni qo'shish, EKUB, EKUK, logarifm, burchak sinusi, burchaklar yig'indisi sinusi, kosinuslar ayirmasi.

THE THIRD-PERSON HUMOR IN MATHEMATICS

ABSTRACT

The article provides data on the use of mathematical humor about student's mistakes on the example of the concepts of reduction of fractions, the addition of fractions, the logarithms, the sine of the sum of angles for teaching mathematics, understandable and entertaining

Keywords: Mathematical humor, prime numbers, proportion, fraction's denominator and numerator, the reduction of fraction, the addition of fractions, LCD, GCM, logarithm, the sine of the angle, the sine of the sum of angles, the difference of the cosine
