ANNOTATSIYA

Interfaol metodlarida oddiy va murakkab moddalarning ekvivalentlarini masofaviy (distansion) ta'lim muhitida aniqlash va o'qitish metodikasi. Elementlar kimyoviy reaksiyalarga kirishayotganda o'z ekvivalentlariga proporsional miqdorlarda birikadi va almashinadi.

Kalit so'z: Interfaol mashg'ulot turlari va ularni tanlash, interfaol ta'lim va tarbiya jarayoni ishtirokchilari, ekvivalent - teng qiymatli, moderator, trener, tyutor, fasilitator, mentor, kouch, konsulytant, lektor, ekspert, innovator, kommunikator, o'qituvchi, menedjer, spekter, asissent.

ABSTRACT

Methods of determining and teaching the equivalents of simple and complex substances in interactive methods in the distance learning environment. When elements enter into chemical reactions, they bind and exchange in quantities proportional to their equivalents

Keywords: types of interactive training and their selection, participants of the interactive training and educational process, equivalent - equal, moderator, coach, tutor, facilitator, mentor, coach, consultant, lecturer, expert, innovator, communicator, teacher, manager, spectator, assistant
