TASKS AND SOLUTIONS ACTUAL PROBLEMS INCREASING THE EFFICIENCY OF LEARNING THE FUNDAMENTAL SCIENCES

ABSTRACT

The article discusses topical problems of teaching the fundamental sciences in schools and universities. The necessity of taking into account the modern development of scientific and technological progress in the standardization of fundamental sciences is shown. Attention is paid to updating laboratory facilities in the spirit of modernity. The reasons for the lag of the educational material from the technical development are revealed. The need to create textbooks in accordance with the present day is revealed.

Keywords: intelligence, modern, innovative, future, textbooks, laboratory, standard, ability.
