ANNOTATSIYA

Mazkur maqolada bugungi kunda qurilish sohasida keng qo'llanilayotgan beton qorishmasining tarkibini to'g'ri tanlash orqali uning mustahkamligini oshirish usullari bayon qilingan.

Kalit so'zlar: kalass, marka, beton tarkibi, struktura, qum, shag'al, sement, suv, siqilish, cho'zilish, qorishma, tabiiy namlik, suvning zichligi.

INCREASE THE GRADE OF CONCRETE DUE TO THE CORRECT SELECTION OF MIXTURES IN THE COMPOSITION OF CONCRETE

ABSTRACT

This article describes methods of increasing its durability due to the correct choice of the composition of the concrete mixture, which is widely used in the construction industry today.

Keywords: concrete class, concrete brand, concrete structure, sand, gravel, cement, water, compression, stretching, mixed, natural humidity, density of water.
