ABSTRACT

Actuality of this article is that it is directed to define and characterize the role of psycholinguistic aspects in the process of teaching English, which simultaneously influences the acquired knowledge and the process of its implementation in real life. In addition, though the department of psycholinguistics is considered one of the youngest branches of linguistics, it is significantly important in the educational process.

Keywords: psycholinguistics, psycholinguistic aspects, language production, language comprehension, language acquisition
