In today's world, English language considers very well-known and useful among the planet, as well as in our culture. In this article it is discussed several benefits of learning English as a foreign language and given divers example of those arguments.

**Keywords:** common language, international communications, international business, academia, medicine, technology, tourism, law, “unique toolkit”, “door of the world”

### INTRODUCTION

In today's globalized world, there are many reasons to study a foreign language and plenty of benefits to learning English specifically. In recent years, there have been around 1.5 billion English speakers around the world, which represents a fifth of the world's total population. [1]

Our lives depend heavily on the English language since it facilitates communication. All around the globe, it is the primary language used for learning any subject. Students should learn English since it will widen their horizons, help them to build their emotional intelligence, and open up career chances.

### METHODOLOGY

Additionally, since English is often the sole language used for communication, its usage as an international language is expanding with time. The majority of authors write in English because it is the only language that the vast majority of readers are familiar with and because it allows them to express their thoughts most effectively. English is also frequently used in the literary and media sectors to publish books.

English is spoken in some of the most economically and culturally influential countries globally, and over the centuries it has become the main language not only for international communications but also for international business, medicine, academia, technology, science, and law.

It is clear that the importance of the English language in Uzbekistan is increasing day by day. Almost all multinational companies will use English when they organize meetings with other foreign countries companies. Moreover, most universities accept this language, and students in higher education are taught this subject six or seven times a week. It is a fact that all around the world; tourists use this language to communicate with other nationals as a common language. British Council argued that the spread of English provided unlimited access to the modern world of science, information and communications technology (ICT), money, power, international communication, and intercultural understanding as well as entertainment and many more fields. [2]

## RESULTS

The English language provides individuals with increased employment prospects, particularly in multinational office settings. Additionally, proficiency in English facilitates travel to countries famous for their well-designed architecture and historical landmarks. The tourism industry in Uzbekistan has experienced a notable surge, with a majority of visitors arriving to explore the historical cities that have been constructed in previous eras. In order to enhance global tourism, it is recommended that the government establish additional language learning centers for future generations. With good understanding and communication in English we can travel around the globe. Because it is international language for foreigners, it is easy to get assistance and help in every part of a world. We can test it by online travel. Any travel booking site we can find will have English as a booking option. [3]

Currently, a vast majority of companies have established a connection with this language due to its widespread popularity across the globe. Moreover, learning a foreign language provides significant opportunities for effective communication with international offices.

## DISCUSSION

In order to foster academic development in Uzbekistan, it is imperative to acquire proficiency in foreign languages, particularly English, which plays a significant role in various domains. Presently, the fields of medicine, technology, and science require the acquisition

of foreign language skills, particularly in English, due to the abundance of information available in these domains. Because it is the dominant language in the sciences, most of the research and studies you find in any given scientific field will be written in it as well. At the university level, students in many countries study almost all their subjects in English in order to make materials more accessible to international students. English remains a major medium of instruction in schools, in universities. There are large numbers of books that are written in the English language. English literature is vast and rich. Many of the latest scientific discoveries are documented in English. [3]

Current years, many films, TV shows, books and music are published and produced in English language. By understanding English, you won't manage to rely on translations and subtitles anymore and you will also continuously increase your English listening and reading abilities.

Those who are still unaware of importance of English should start learning it as a time will come when everything will be understood, spoken and written.

In a lot of ways, that time is already here. Go ahead, watch some media, get an idea of the language. You will not be disappointed. [3]

English is recently the language of the internet. A witnessed of 565 million people use the internet almost every day and about 52% of the world's most visited websites are displayed in English. [1] Thus, learning this language gives access to over half the content of the internet, which might not be available otherwise. If it is for entertainment or for job, whether you understand English, you will be able to change information with more people online and use many more materials are given in Internet.

## CONCLUSION

Presently, a significant proportion of corporations have forged a linkage with this language due to its extensive prevalence worldwide. In addition, acquiring proficiency in a foreign language presents substantial prospects for efficient communication with global entities.

To promote academic advancement in Uzbekistan, it is crucial to attain competence in foreign languages, specifically English, as it holds substantial importance in diverse fields. At present, the domains of medicine, technology, and science necessitate the attainment of foreign language competencies, specifically in English, owing to the profusion of information accessible within these fields.

English is widely utilized and holds a prominent position as

a language of global significance. This phenomenon is affecting various fields across the globe. Undoubtedly, English has played a significant role in the world, making it impossible for individuals to overlook its importance. The technology exhibits promising prospects, facilitating global connectivity and offering potential benefits in both personal and professional domains. Despite the challenges and time commitment associated with acquiring proficiency in English, it is evident that the language holds significant value and can open up numerous avenues for personal and professional growth.
